# Guest Speaker Bios

## CHRIS MAGWOOD

Chris Magwood is obsessed with making the best, most energy efficient, beautiful and inspiring buildings without wrecking the whole darn planet in the attempt.

He co-founded “Camel’s Back Construction”, and helped to design and/or build around 20 homes and a few commercial buildings, mostly with straw bales and often with renewable energy systems.

During this time, he co-authored three books on straw bale construction: *Straw Bale Building*, *More Straw Bale Building* and *Straw Bale Details*. He was also the editor of *The Last Straw Journal*, an international quarterly of straw bale and natural building. He has contributed articles to numerous publications (including *Mother Earth News*, *Harrowsmith*, *Home Power*, and others) on topics related to sustainable building.

He now brings this experience and passion to his role as curriculum developer and instructor at Endeavour. He loves working with learners and collaborating with professionals and newcomers alike to create remarkable buildings and communities.

Chris was awarded the 2008 Excellence in Education Award by the Canada Mortgage and Housing Corporation (CMHC). He was named a Canadian Eco-Hero by *Harrowsmith Magazine*. He has won numerous design and teaching awards, including a Home Sweet Home Award for Affordable Housing.

## JEN FEIGIN

Jen Feigin is a designer, natural builder and DIY maniac based in Peterborough, Ontario.

Jen has been on the natural building scene since 2005. In that time she has developed a deep knowledge for all aspects of sustainable building and design. She has worked on and designed projects ranging from composting outhouses to residential & commercial

buildings. As a teacher, designer and builder she combines practicality and artfulness in equal measures, with a healthy dose of humour and spirit too!

Jen has been a founding instructor for the 5-month sustainable building intensive at Endeavour where she passes on her skills to new and experienced builders.

An artist at heart, she works hard to build healthy, efficient, beautiful buildings that will inspire people through thoughtful design and artfulness.
